## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims, and particularly claims 1 and 15, are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 15 is further rejected as not further limiting the system of claim 1. Specifically, it is vague and indefinite what structure of system claim 1 is being further limited by the method of claim 15.

It is vague and indefinite what entails a "high code rate" and "low error probability" since the metes and bounds are not ascertained with any specificity.

In claim 1, line 15, it is vague and indefinite what a hydrophone "being non-directive in the horizontal" entails.

At the present time, because of the numerous grammatical and idiomatic errors, along with the narrative nature of the claims, allowable subject matter cannot be

determined since the metes and bounds of the claimed subject matter cannot be determined with any specificity.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Specifically, the prior art cited discloses and teaches conventional underwater acoustic communication systems.
